

## Thuan Vo

Dear Sir/Madam,

I am writing to apply for this opening position. After reviewing the job responsibilities and desired skills and qualifications, it's clear that you are looking for an energetic and passionate fiscal analyst. Given these requirements, I believe that my education and work experience would make me an excellent fit.

I'm dedicated to achieving goals and going above and beyond what is expected of me. For example, as a senior in IT major at the University of Washington, I have learned about a big picture of technology from general to detail not limited to information security, network architecture, databases (SQL), human computer interaction, web development (JavaScript, HTML, CSS), server-side MVC web frameworks (C#) and so on.

In addition, I enjoy working as part of a team and like to apply my technical knowledge. For example, as a student at University of Washington, I have done many group projects using Agile Methodology. I strongly believe that a team will deliver better result than an individual. Within a small group, I am a member that will deal coding and developing product. I'm also a quick learner and have the ability to adapt and complete new tasks with minimal supervision. The last but not the least, I'm a hard worker. Seeing successfully codes running as what I expected is my happiness.

For these reasons, I'm confident that I can transition into this position and start contributing to your team immediately. I would love the opportunity to discuss my qualifications and how they can meet the requirements and expectations of the position further. Please feel free to contact me by email at [tvo93@uw.edu](mailto:tvo93@uw.edu) or (206)-972-7731.

Thank you for your time and consideration!

Sincerely,  
Thuan Vo
